OptiFiber PES-14® Microfiber Cloth Filtration Media Offers Advantages Compared to Other Types of Filtration

- 5 micron microfiber cloth media is specifically engineered to remove suspended solids, turbidity and fine particles up to 50% better than other filtration media
- Thick pile construction provides depth for storage of solids particles and removal of small particles to enhance disinfection
- Significantly reduces backwash volume resulting in less energy usage
- Double or triple flow capacity within an existing footprint of granular media, microscreen or other filter systems
- Designed for use with AquaDisk®, AquaDiamond®, Aqua MegaDisk™, AquaDrum®, and Aqua MiniDisk® cloth media filters

Too Much to Swallow?

Retrofit Your Failing Gravity Sewer with the E/One Solution

If rain events are overloading your wastewater treatment plant, E/One Sewers can insure that real wastewater will be the only thing that your facility has to deal with in the event of storms or high groundwater.

Huge resulting savings on facility upkeep, treatment and electric costs make E/One the green way to go for your next central sewer replacement or rehabilitation project.
