# Welcome to the 2016 NEWEA Annual Conference. It's Prime Time!

I invite you to advance our water quality profession and celebrate its importance by participating in all the Annual Conference has to offer. As the region's premier water quality conference and exhibit, this event is expected to draw some 2,300 professional attendees. This year's conference includes not only 30 technical sessions, two poster sessions, and 200 plus exhibitors, but also numerous networking opportunities, committee meetings, and social events.

Take a close look at this year's program; the Program Committee has worked diligently to provide a wide range of topics for the technical sessions. These include industry hot topics such as Innovative Treatment Technologies, On-Site Power Generation, Innovative Solutions to Equipment, and Operational Challenges, Regulatory Challenges, and Watershed Nitrogen Tracking and Accounting.

To get the most out of this Program, I encourage you to explore where you typically may not—visit a Young Professionals event; stop by and visit with an exhibitor you may not know; check out the student poster competition; or visit the committee fair and join a committee.

In keeping with this year's theme of increasing Public Awareness, on Monday our opening session will feature Keynote speaker George Hawkins from DC Water. George will share his successes on the public awareness/outreach front in the DC metro area. We are further honored that WEF President Paul Bowen will offer his insight on current WEF initiatives and the water quality industry as a whole.

I'd like to recognize the significant efforts of the conference committees, which include Program, Registration, Exhibits, Manufacturer's Representative, Awards, and Conference Arrangements. I'd also like to acknowledge the NEWEA office staff: Mary Barry, Janice Moran, and Linda Austin for their energy, professionalism, and patience in putting this great event together.

I hope that you take advantage of all the Conference has to offer in the way of technological enrichment, but also that you seize the opportunity to see old friends and make new acquaintances. These are all ways that this event helps us as professionals to better address the challenges of protecting public health, protecting the environment, and providing the foundation for thriving communities and economies.

Have a great event!

Sustainable stormwater, wastewater and drinking water solutions all require more collaboration than ever.

Of all the water on Earth, only 2.5% is fresh water, the rest is salty oceans. Rivers and reservoirs make up only 1.2% of all fresh water, the other 98.8% is stored as permafrost and groundwater. Recycling readily accessible surface water is critical to meet the high demand for use by individuals, communities and industry. **Learn more about the water quality industry and its role in the water cycle at newea.org**

### Flower Arranging 101 9:00 AM-3:00 PM • Coordinator: Joy Lord

In the middle of January, who doesn't need some fresh flowers for cheer? Following breakfast, we will explore all things flowers! Throughout the morning we'll make various tissue paper flowers – both large and small – and then move on to the fresh flowers. If you have ever wanted to know how to make an arrangement for your home, these instructions will help create a simple base from which to explore your own creativity. No two arrangements will look alike. We will make a very small arrangement in a unique vessel, a larger arrangement and, as usual, there will be a few surprises during the day.

Our lunch will be off property but in the mall, so a short walk INSIDE. No need to bring anything this year. Just yourself!
