Number	Standard	Number	Standard
1.	Fall Protection – General Requirements	6.	Ladders
2.	Hazard Communication	7.	Powered Industrial Truck
3.	Scaffolding	8.	Machine Guarding
4.	Respiratory Protection	9.	Fall Protection – Training Requirements
5.	Lock Out / Tag Out	10.	Electrical – Wiring Method

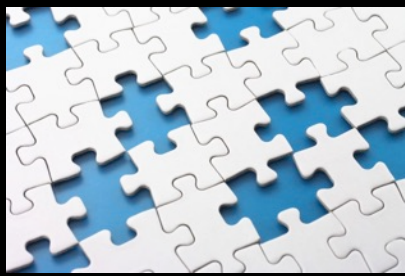

- Fall Protection – 4', 6', 10'
- Guardrail Systems, Safety Net Systems, Personal Fall Arrest Systems, or a Combination.

- 
- Effective information & training
  - Written program
  - GHS Training
  - SDS

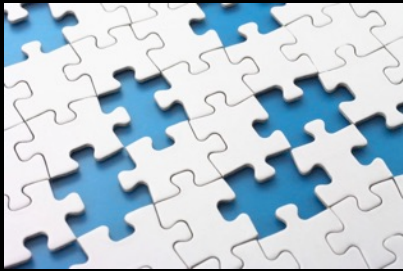

- Inadequate foundation
- Fall Protection at 10'
- Access / Egress @ 2'
- Not fully planked

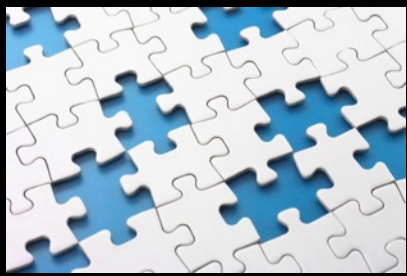

- 
- Improper respirator selection
  - Medical evaluation
  - Written program
  - Fit test
  - PFT

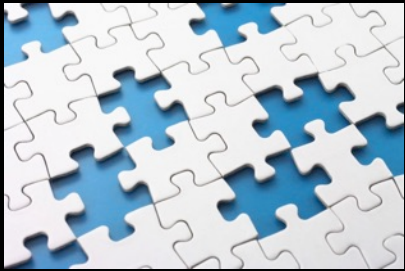

- 
- LOTO procedure
  - Periodic Inspection - Annually
  - Training

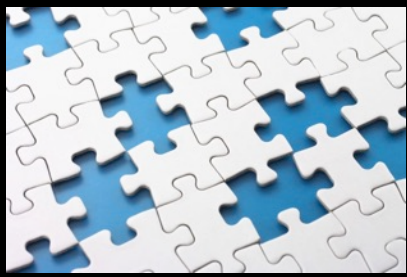

- Extension ladder – 3' above
- Stable/Level foundation
- Broken ladder usage
- Used as designed
- Top step usage

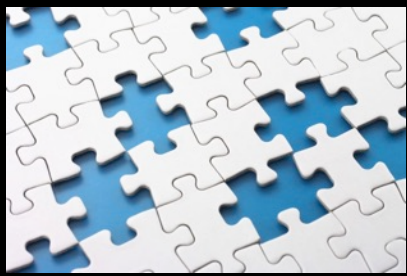

- 
- Competent/Trained operators
  - 3 year operator evaluation
  - Unsafe & left in service
  - Daily inspection

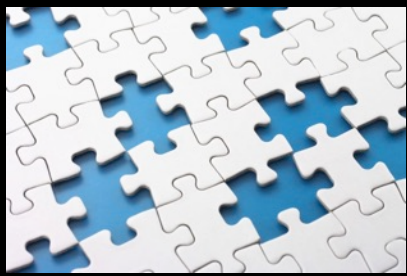

- Point of Operation, Nip Points, Rotating Parts, Fly Chips/Sparks
- Foundation Anchored
- Missing Guards

- Inadequacies in Affected Employee's knowledge
- Written certification of training
- Recognize hazards of falling
- Competent Person

- Substitute for fixed wiring
- Defective temp. cord
- Broken/Missing cover (panel/  
outlet)
