

# Combined Sewer Overflow & Wet Weather Issues

Two-day Conference & Tour • October 29–30 • Portland, ME

**2018**  
SPECIALTY  
CONFERENCE  
& WORKSHOP  
SERIES

Join us for a two-day conference, “Planning for Change” to discuss and share national and regional working knowledge and experiences on wet weather issues, climate change and resiliency.

The conference will kick off with our keynote speaker, Mohammed Billah, U.S. EPA who will host a question and answer session about wet weather regulatory policies. The conference will also feature a panel discussion with City of Portland, ME officials; a tour of South Portland’s Water Pollution Control Facility; a networking social and exhibits hall.

Municipal, state, and federal government employees as well as private consultants, contractors, and researchers involved in developing CSO long-term control plans, integrated wastewater plans, and infiltration and inflow (I/I) reduction programs utilizing gray and/or green strategies to reduce overflows during wet weather events are encouraged to attend.

**SPONSOR: CH2M is now Jacobs**

**Sponsorship and exhibit opportunities are available**
