The Honorable Elizabeth Warren
Member, United States Senate
317 Hart Senate Office Building
Washington, DC 20510

Dear Representative Clark, Representative Keating, Representative Kennedy, Representative Lynch, Senator Markey, Representative Moulton, Representative Pressley, and Senator Warren:

We are writing to urge you to support funding the NOAA ocean acidification research and monitoring budget line item (Integrated Ocean Acidification) at \$22 million for FY20. Ocean acidification is changing the very chemical nature of our oceans, harming a multitude of important species today and threatening more in the future. Fishermen, shellfish farmers, and coastal communities who depend on productive coastal areas for their jobs and recreation will suffer if we don't respond to the challenge of ocean acidification. Federal research dollars can help avert impacts by deepening our scientific understanding of the problem, enabling local businesses to remain productive through awareness and adaptation, and active planning on next steps, both locally and nationally.

This line item will enable our federal and state scientists to inform policymakers' response to this challenge and allow them to work with local communities and sectors that will be affected. Increased funding for the Integrated Ocean Acidification line item in the Office of Oceanic and Atmospheric Research within NOAA will provide desperately needed resources and make sure we address one of the most critical threats to coastal communities and oceans today.

Thank you for your time and consideration of our request.

Sincerely,

Mary Barry
Executive Director

2019 Executive Committee

President

Raymond A. Vermette, Jr.
Dover, NH

President Elect

Jennifer Kelly Lachmayr
Wakefield, MA

Vice President

Virgil J. Lloyd
Manchester, CT

Treasurer
