

CONFERENCE ANNOUNCEMENT & CALL FOR ABSTRACTS

THE NORTHEAST RESIDUALS & BIOSOLIDS CONFERENCE October 19-30, 2020

The joint NEWEA/NEBRA conference and exhibit is a great forum to learn the latest trends in the management of biosolids and residuals, and it is a “must” for all those involved in the challenge of managing these materials in the Northeast. As part of our ongoing adjustments due to the COVID-19 pandemic, we have decided to make this year’s annual conference a virtual one with a series of on-line webinars packed with the same high-quality content and networking you would expect from the live conference.

The conference will take place over several weeks with a series of webinars and online sessions where speakers will present to audiences virtually, each covering a different topic. This web-based conference gives us the opportunity this year to reach out well beyond the Northeast and solicits participation nationally for this premier biosolids conference.

Abstracts are currently being accepted in the following four topics:

- COVID-19 Residuals Management Impacts
- PFAS Research and Impacts to Residuals programs
- Residuals Master Planning and Co-digestion
- Odor and Impacts on End Use

Please Submit Abstracts Online by Friday, July 31, 2020.

Join us this Fall for a webinar-based technical conference, networking opportunities, the latest residuals management trends, and even a couple of fun virtual events! Contact training hours will be awarded for operator and engineering re-certification in participating states, as approved.

Sponsored by: NEWEA’s Residuals Management Committee & North East Biosolids and Residuals Association (NEBRA).

For more information or questions, please contact:
