

CALLING ALL HOMEBREWERS

Fourth Annual *Source Water Brewers Homebrewing Competition*

With the goal of bringing NEWEA members even closer to the source waters that we strive to protect, NEWEA is seeking homebrewers for our 4th Annual Source Water Brewers Competition. This friendly competition will challenge each brewer to create an original beer using local water supplies for sharing at the Source Water Brewers Competition, July 26, 2023, 6:30PM in Plymouth, MA.

THE DETAILS

Brewers will provide all ingredients and supplies for brewing including the source water (from your tap) which will be used in all phases of the brewing process with no supplemental conditioning, except dechlorination if needed.

The beer must be ready to pour at the summer 2023 Source Water Brewers Competition, July 26th in Plymouth, MA. Tasting at the event will require approximately 150-300 ounces of finished beer. Judging will be provided by the crowd of NEWEA members and guests. Attendees will have opportunity to taste each beer and provide votes for top three beers. The watershed committee will tally votes in real-time and announce the winner during the event. Participants will receive prestige among NEWEA members and a commemorative Source Water Brewers t-shirt. The winning brewer will receive a personalized beer stein commemorating the grand prize beer.
