

Funding for I/A Septic Systems Brewster, MA

Mark Nelson, Principal

Horsley Witten Group, Inc.

Pleasant Bay Watershed in Brewster

I/A System Benefits for Brewster

- Extent of Nitrogen Removal Needed for Coastal Watersheds May Not Be Great Enough to Require a WW Treatment Plant

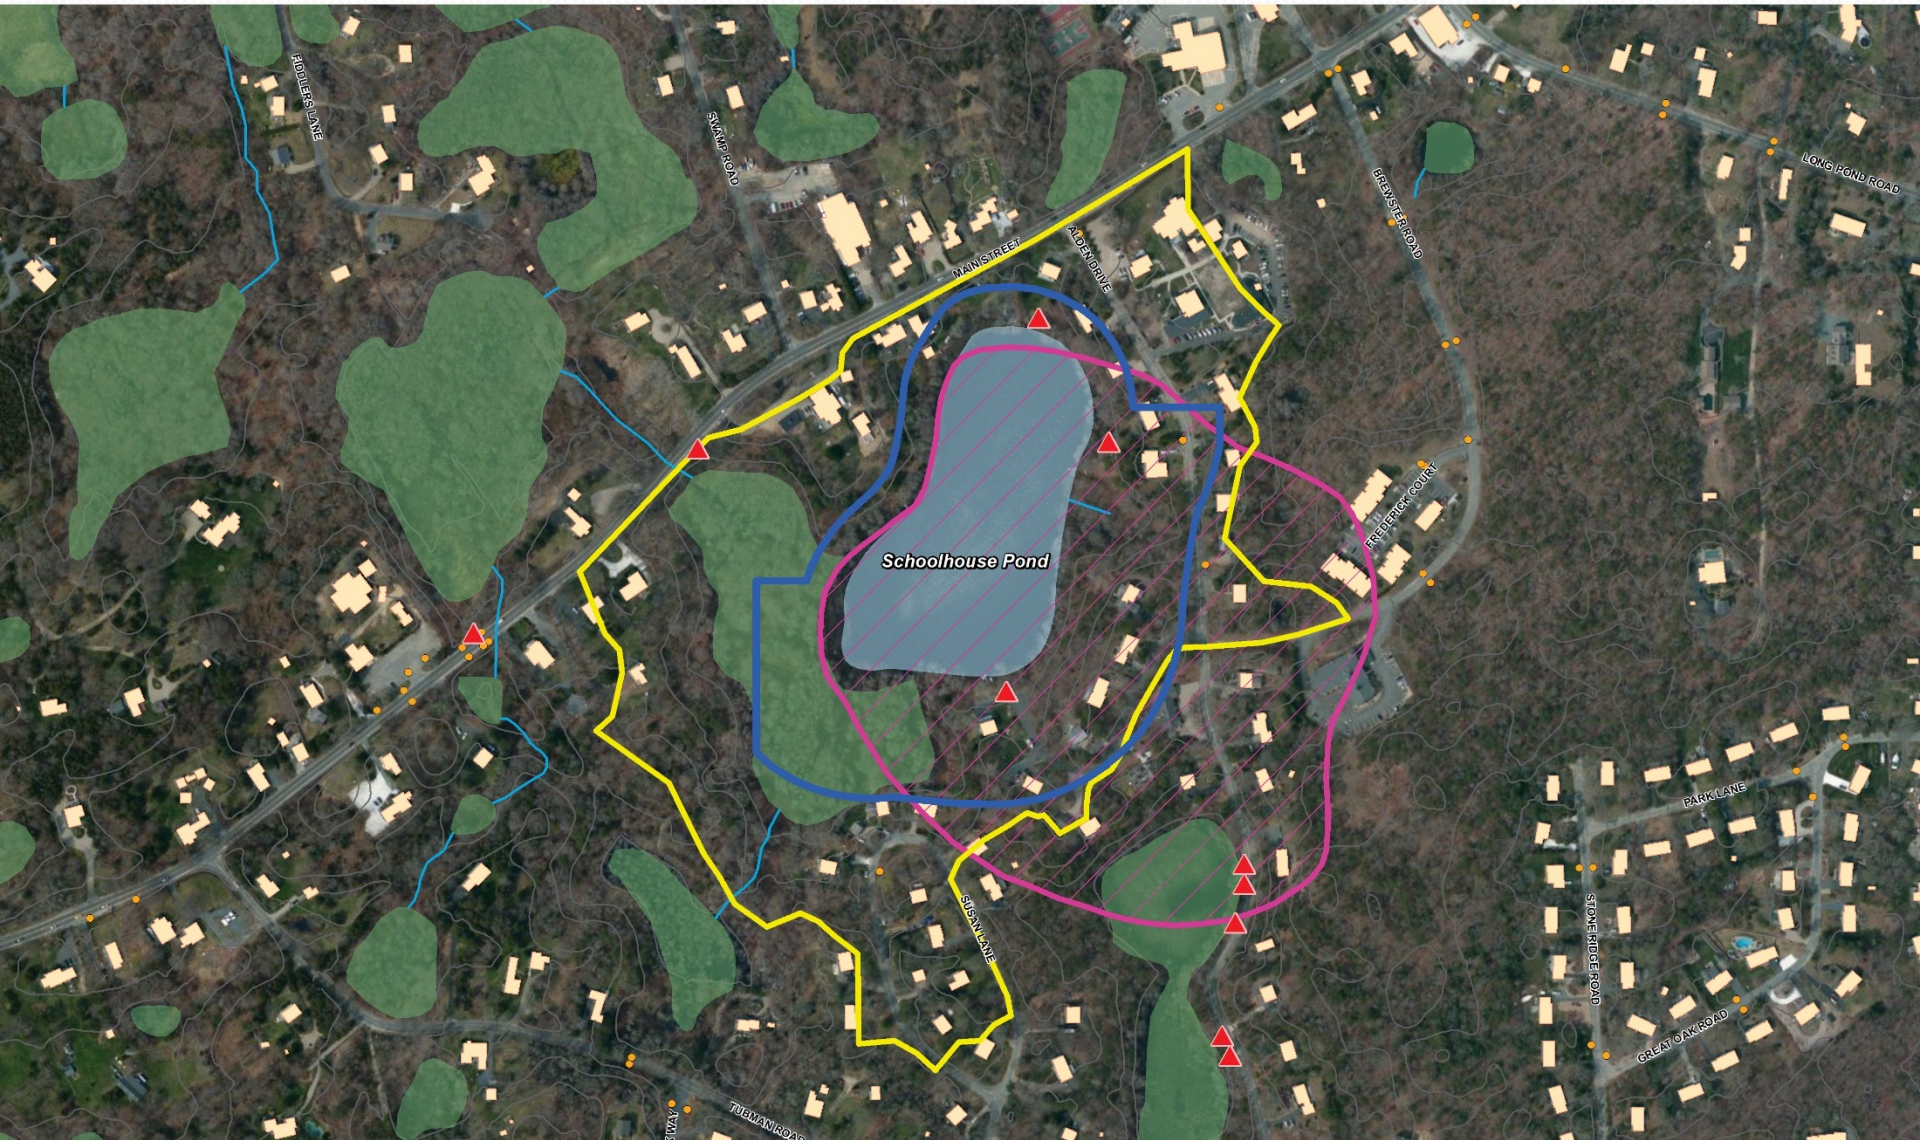

I/A System Use Under The Pleasant Bay Watershed Permit

- Provisional and Pilot I/A Systems Allowed Under the Permit
- Further clarity on funding potential through SRF would be helpful
 - System Ownership, RME Needs, Level of DEP Performance Approval Needed

Schoolhouse Pond

I/A System Benefits for Ponds

- Fresh Water Ponds - Given The Number of Homes Requiring Septic Upgrades Around Each Pond, WWTPs are Not a Cost-Effective Option

SRF Funds for I/A Systems Issues and Questions

- Clarification on Funding for I/A systems adjacent to fresh-water ponds.
 - Compliant Title 5 systems that remove phosphorus
 - Phosphorus I/A systems with pilot/provisional approval

Issues and Questions

- Type of Regional Plan Approval Needed for Areas Not Subject to a Watershed Permit
- Use of SRF Funds for RME Oversight by Town.

Thanks!
