Nitrogen & Phosphorus Removal Using Process Simulators

**June 5, 2025 - MDC Training Center, Hartford, CT
8:30 AM - 3:30 PM**

Get the N & P Out!

Are you ready to run a water resource recovery facility on your own without the implications of permit compliance and operating costs? Test your skills on a computer simulation. This workshop covers the fundamental concepts of operating an activated sludge plant to achieve nitrogen and phosphorus removal using a powerful combination of lecture material and a hands-on process simulator.

Attendees will be led through the simulations using state-of-the-art SimuWorks™ software based on Hatch's GPS-X program. Laptops will be provided. Lunch included.

REGISTER ONLINE BY 5/29/25

COST: \$50 for CTWEA Members
\$75 for Non-Members (incl. 1yr membership)
Limited Attendance.
6.0 Training Contact Hours will be awarded.
