WORKING FOR WATER QUALITY

A large, detailed image of a Flygt 4320 submersible mixer is positioned on the right side of the advertisement. The mixer has a grey motor housing and three large, curved yellow blades. It is mounted on a metal frame. The background is a solid blue color.

# LET'S MIX PERFORMANCE WITH ADJUSTABILITY AND MAXIMUM EFFICIENCY.

The Flygt 4320 submersible mixer's revolutionary design couples a high-efficiency mixer with an integrated variable frequency drive. The 4320 simplifies variable speed mixing and eliminates the need for an external VFD. A variety of ratings and propeller options meet a broad range of thrust requirements. And with motor efficiency comparable to the Super Premium Efficiency IE4 levels and fully adjustable speed, the Flygt 4320 delivers the lowest life cycle mixing energy costs.

**Superior mixing with adjustability and simplicity, for unsurpassed energy savings.**

**For more information on the Flygt 4320, pumping and mixing applications, please contact your local Flygt/Xylem office in Woburn, MA. Office: 781-935-6515**

**On the cover:** Decatur WAY—Lowell, Massachusetts, is a green alley that collects rainwater and allows that water to infiltrate into the ground before entering the city's drainage system. It is also an urban amenity, providing a pedestrian corridor, outdoor art gallery and neighborhood meeting place.

**ALL-TERRAIN SEWER™**

Are you dealing with failing septic tanks?  
 Is I/I from your existing sewer system eating up your budget?  
 Do you have a sewer project with challenging terrain looming ahead?  
 Get after it.

ALL-TERRAIN SEWER™ low pressure systems from E/One give you the freedom to sewer anywhere.

Environmentally sensitive, economically sensible™. ALL-TERRAIN SEWER low pressure systems are significantly more affordable than conventional gravity sewers, safer than septic systems, and they're a light touch on the land.

Plus, our ALL-TERRAIN SEWER low pressure systems carry a proven track record of reliability with the lowest system life-cycle costs in the industry.

Whether it's dead or dying septic tanks or expensive inflow and infiltration, we can help. Learn more at [allterrainsewer.com](http://allterrainsewer.com)

Save Time and Money  
 on Your Next Grinder Pump Install

4,000+ psi  
interlocking ballast

Counteracts Over  
 1,100 lbs of float  
per 10' of vertical distance

**DON'T LET WEATHER RAIN ON YOUR PARADE**

Weather can adversely affect the true strength of concrete.

**RAIN**  
 Too much water on the site can weaken concrete.

**HEAT**  
 Heat can damage the integrity of concrete as it sets.

**COLD**  
 Cold can prevent concrete from setting.

**SOIL**  
 Regardless of the dry the ground can be soft or weak.

**EASY**  
 DROP-IN FASTNESS  
 Install over grout with minimal breakage.

**SECURE**  
 PROTECT YOUR PUMP  
 Ball support is ideal for floats and accessories.

**FAST**  
 DON'T WAIT AROUND  
 Don't waste time waiting for the concrete to set.

**EXCEEDS**  
 MANUFACTURER REGULATIONS  
 For ALL installation ranges.

**FLEXIBILITY**  
 A EXPANSION JOINT  
 Allows extra cracking risk for added strength.

LEARN MORE

**SAVE 20-40%**  
 Over the cost of making your own concrete.

Cost to mix your own:

LABOR (2 MEN) \$85/h  
 FORM MATERIAL \$50  
 CONCRETE \$35-\$70  
 BACKHOLE IDLE \$160  
**TOTAL COST \$450**
